

## Student traineeship in Brussels

Are you interested in gaining knowledge about European research, innovation and education policies and programmes? Do you want to acquire international work experience in a small and dynamic Swiss team abroad? Are you eager to acquire experience in intercultural competences in Brussels, the thrilling heart of Europe? If yes, do not hesitate to apply for this student traineeship at SwissCore now!

### Who are we?

SwissCore in Brussels acts as a bridge between the Swiss and European knowledge landscapes and supports the Swiss participation in the research, education and innovation programmes of the European Union. We are an information, networking and training office for Swiss and European stakeholders in the mentioned fields. We informally represent the Swiss knowledge community towards European institutions and Brussels-based interest groups. SwissCore is co-funded by the Swiss National Science Foundation (SNSF), the State Secretariat for Education, Research and Innovation (SERI) and Innosuisse.

### What will you learn and do?

You will immerse yourself in European research policies and programmes and collaborate closely with research institutions and communities. Your work also includes overlaps with innovation and education topics. As a junior member of our team, you will contribute fully to every-day operations. Your tasks include collecting and processing intelligence, (co-) organising and participating in events, (co-) organising visits and receiving delegations as well as writing articles and reports. In addition to practical on-the-job work experience (50%), you will have the opportunity to focus on a dedicated project in the research domain (50%), with a possibility to combine it with a master thesis.

### Who are we looking for?

We are looking for a motivated and eager student having completed a Bachelor or following a Master programme at a Swiss higher education institution in any discipline, interested in and committed to European integration and cooperation. You should have affinity with education, research, and innovation. In particular, you should be interested in Swiss and European research policies and programmes. Since writing makes for a large part of your work, you should be fluent in English as well as in French and/or German, both in writing and speaking. Familiarity with MS Office and ICT tools in general is strictly requested. We are particularly looking for an investigative mind and a dedicated worker who enjoys flexible teamwork.

### What do we offer?

- varied and dedicated work experience within a multi-cultural and open setting;
- six months full time traineeship in the heart of Brussels;
- supervision and mentoring by a senior staff member with attention for personal development;
- monthly remuneration.
